Instale as antenas de sua casa bem longe dos fios dos postes! E se a antena cair na fiação nem pense em pegar de volta para não levar um choque, que pode ser fatal. Avise antes à sua distribuidora de energia para ela desligar a rede elétrica.

Fazer gato/macaco de energia é perigoso, viu? Coloca você e sua família em risco de acidentes, que podem ser fatais, e além disso é crime, pode dar cadeia.  
**Não vacile não.**

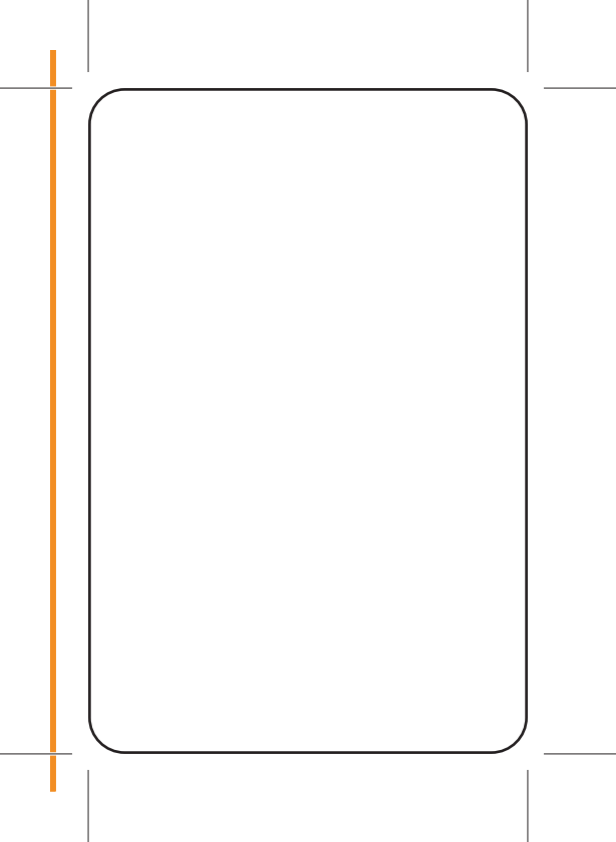

Viu um fio caído na  
rua? Isole a área e  
passe longe para  
não tomar um  
choque fatal e avise  
imediatamente para  
sua distribuidora  
de energia.  
**Não vacile não!**

Vai construir, reformar ou pintar? Então, fique longe dos fios dos postes. Nem pense em aproximar materiais metálicos, como barras de ferro e vergalhões, da rede elétrica porque isso pode causar acidentes fatais.
