Instale as antenas de sua casa bem longe dos fios dos postes! E se a antena cair na fiação nem pense em pegar de volta para não levar um choque, que pode ser fatal. Avise antes à sua distribuidora de energia para ela desligar a rede elétrica.

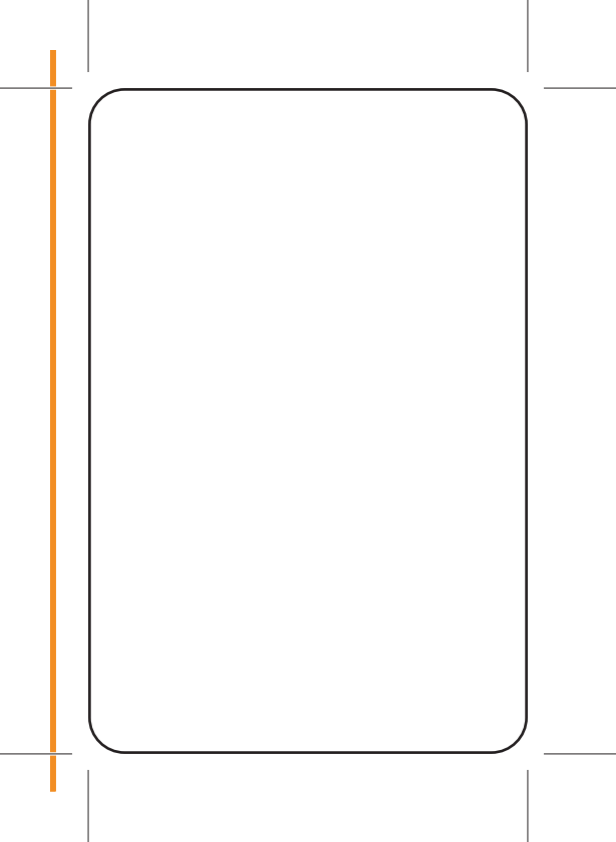

Fazer gato/macaco de energia é perigoso, viu? Coloca você e sua família em risco de acidentes, que podem ser fatais, e além disso é crime, pode dar cadeia.
Não vacile não.

Viu um fio caído na
rua? Isole a área e
passe longe para
não tomar um
choque fatal e avise
imediatamente para
sua distribuidora
de energia.
Não vacile não!

Vai construir, reformar ou pintar? Então, fique longe dos fios dos postes. Nem pense em aproximar materiais metálicos, como barras de ferro e vergalhões, da rede elétrica porque isso pode causar acidentes fatais.
